THE BIGGS BOILER WORKS COMPANY

Specialists in Steel Plate and Tank Construction

Case Avenue and William Street

Akron, Ohio

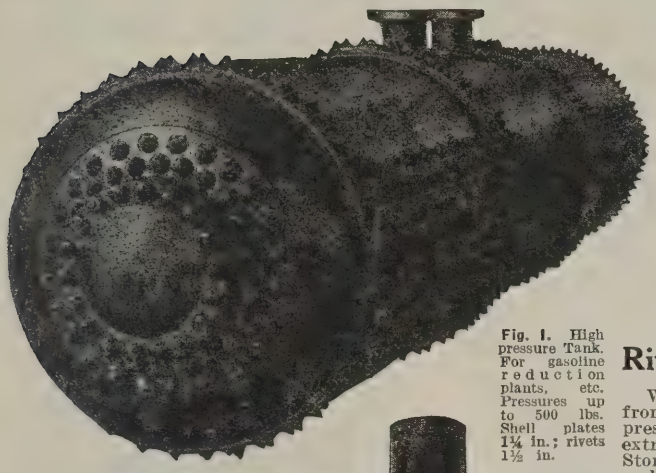

Fig. 1. High pressure Tank. For gasoline reduction plants, etc. Pressures up to 500 lbs. Shell plates 1¼ in.; rivets 1½ in.

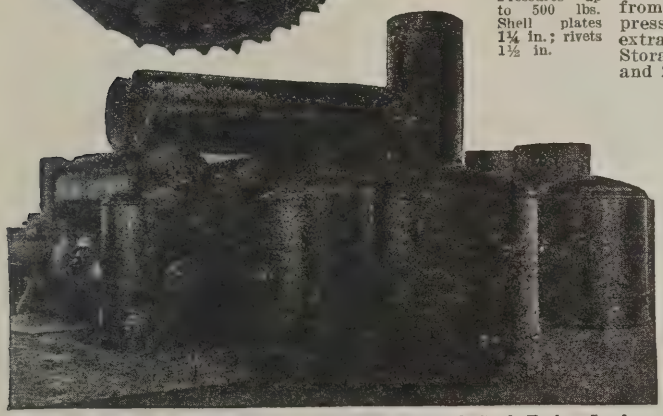

Fig. 2. Riveted Steel Tanks. In foreground special steel tanks with jacketed bottoms; above at rear, pressure and storage tanks.

Fig. 3. Biggs Vulcanizer 10' x 30', with "Simplex" boltless quick-closing door.

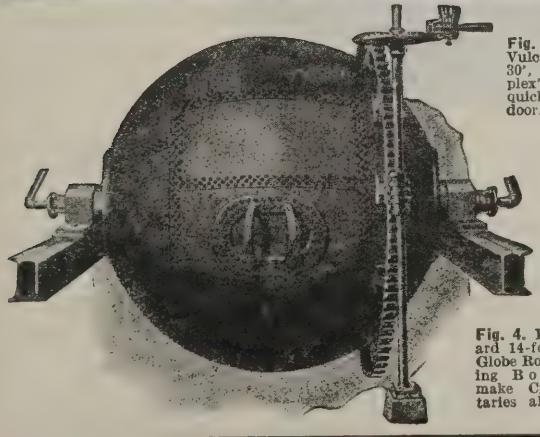

Fig. 4. Biggs Standard 14-foot Diameter Globe Rotary Bleaching Boiler. We make Cylinder Rotaries also.

PRODUCTS

STEEL TANKS of every description, including Pneumatic Water Supply, Hot Water Storage, Air Receiver, High Pressure, Steam Jacketed, Cone Bottom, Agitator, Sugar House, Soap Making, Bleaching, Gasoline and Oil Storage; CREOSOTING CYLINDERS; OIL STILLS; RIVETED STEEL PIPE; VULCANIZERS and DEVULCANIZERS with "Simplex" Boltless Quick-closing Doors; GLOBE and CYLINDER ROTARY BLEACHING BOILERS; SULPHATE and SULPHITE DIGESTERS.

Also Feed Water Heaters; Oil Refinery Equipment; Sugar Plantation Equipment; Sugar Manufacturing Equipment; Soap Plant Equipment; Incinerators; Autoclaves, Kiers, Kettles, Rotary, Steam and Direct-heat Dryers; Rubber and Paper Mill Machinery; Brick Hardening Cylinders; Cotton Fumigators; Mixers and Agitators; Oil Filters; Sterilizers; Saturating Pots; Impregnators; Insulated Wire Machinery; Rubber Machinery; Paint Making Machinery and Asphalt Heating Tanks. Steel Plate Construction up to 1½ in. plate.

Riveted Steel Tanks (Stock Sizes)

We carry in stock 135 standard size storage and pressure tanks, ranging from 84 to 25,000-gal. capacity. Stock pressure tanks designed for working pressures up to 100 lb., embracing such tanks as pneumatic water supply, extra heavy hot water storage, with and without coils, and air receivers. Storage tanks for oil, gasoline, asphalt, acid and similar products. (Figs. 1 and 2.) All tanks mentioned above covered by price list and discount sheet.

High Pressure Steel Tanks

Our plant and equipment permit us to fabricate the heaviest type of steel tank and steel plate construction, building as standard practice, tanks made of 1½ in. plate and for working pressures up to 500 lbs. We will furnish price list and discount sheet on 167 standard sizes of high pressure tanks—in addition to storage and low pressure tanks previously mentioned—these tanks ranging from 24 in. diameter by 5 ft. long to 60 in. diameter by 16 ft. long, built for working pressures of 100 to 300 lbs., in accordance with A. S. M. E. Code, Ohio, Massachusetts, Detroit and other specifications. (Figs. 1 and 2.)

Oil Stills and Refinery Equipment

Our plant and equipment naturally permit us to manufacture that type of steel plate work requiring the highest degree of mechanical perfection, such as Oil Stills, Rundown Tanks and various Refinery Equipment. It is on work of this nature that hydraulically driven rivets, plus good general shop practice, produce superior products. (Fig. 1.) We excel also in the construction and erection of 55,000 and 80,000 bbl. storage tanks.

Vulcanizers, Creosoting Cylinders, Brick Hardening Cylinders, Sterilizers, etc.

Biggs horizontal vulcanizers are recognized as standard equipment throughout the rubber industry, being furnished in standard diameters from 24 in. to 10 ft. and various lengths for any required pressure.

Equipped with "Simplex" patented quick-closing vulcanizer door, which permits even the 10-ft. size to be opened and closed by one man in less than 30 seconds. Fully guaranteed and accepted by all insurance companies. (Fig. 3.)

Cost is often offset by reduction in operating expense of vessels equipped with this door, and in greater production as contrasted with old bolted type. Customers using Biggs equipment have reported a saving of from 2 to 2½ hours per operation on the larger sizes. Write for catalogue.

Rotary Devulcanizers and Steam Dryers

Biggs jacketed rotary devulcanizers furnished in various sizes and built for any pressure. Steam pressure is carried in jacket surrounding entire shell and both heads, material to be treated being placed in inner chamber. Staybolts support entire collapsing load.

This same type of construction can be furnished stationary, the agitation being obtained by paddles. Equipment is likewise furnished in single shell construction and for both vertical and horizontal installation, embracing such apparatus as mixers, agitators, stills, jacketed tanks, heaters, kettles, etc.

Rotary Bleaching Boilers and Digesters for the Paper Trade

Biggs globe and cylinder rotary bleaching boilers for the paper trade have been installed in various paper mills throughout the world since 1887. Globe or cylinder types of bleaching boilers furnished in practically all sizes and for various pressures and purposes.

Our familiarity with heavy steel plate construction likewise permits us to build sulphate and sulphite digesters of the heaviest type, including riveted and electrically welded seams. Write for new illustrated catalogue. (Fig. 4.)

Write us regarding any type of steel plate construction you require. You will be interested in our folder "What Biggs Does and How."

Elevated Steel Tanks for Sprinkler Service, and for Industrial and Municipal Water Supply.

Steel Storage Tanks, from 500 to 80,000 Barrels Capacity, for All Kinds of Liquids.

Steel Storage Tanks

We design, fabricate and erect steel tanks of all kinds and sizes, and for every purpose.

Our shops, located at Pittsburgh, Pa., and Des Moines, Iowa, are equipped to give prompt service on structural steel and steel plate work of every description.

A separate corps of consulting and designing engineers is maintained at each plant. Our field crews have erected Pittsburgh-Des Moines products in every part of the world.

Pittsburgh-Des Moines products include everything that can be made from shapes and plates: buildings, bridges, viaducts, wireless towers, steel storage tanks for every purpose, standpipes, stills, penstocks and smoke stacks.

Write for catalog on the subject in which you are interested.

Acme Wooden Tanks for All Purposes

We manufacture wooden tanks for all purposes and are in a position to ship promptly to all parts of the country. In order to facilitate distribution we have established factories in New York, Illinois and California.

PRODUCTS

Wooden Tanks for water supply, chemical and color works, and all other purposes.

Wooden Tanks and Steel Towers for village or factory, fire protection, water supply, etc.

Tanks and towers built in accordance with specifications of National Board of Fire Underwriters or Associated Factory Mutual Fire Insurance Companies.

Galvanizing and Pickling Tanks.

Lead Lined Tanks.

Round or rectangular tanks with copper, brass or Monel metal rods.

MATERIALS USED

The Acme Wood Tanks are built of California Redwood, Washington Fir, Cypress, Yellow Pine and White Cedar.

CAPACITIES AND SIZES

Made in all sizes, round and rectangular, ranging in capacity from 50 to 500,000 gallons. The cylindrical tank is the best form of construction and cheaper than any other. Rectangular and oval tanks are only used when special requirements make it necessary.

List showing sizes, capacities, hooping, weights, etc., sent on request.

40,000 GALLON TANK AND 100' TOWER

ADVANTAGES OF A WOOD TANK

For water supply and fire protection the Insurance authorities allow the use of either steel or wood tanks. Wood tanks do not require painting, although they are often painted for the sake of appearance, and then only on the outside. A steel tank requires painting both inside and outside at frequent intervals, making an item of maintenance which is not present with the use of a wooden tank. This is a small item, but of far greater import is the fact that while the steel tank is being painted the plant loses the use of this equipment and does not have fire protection. Many steel tanks have deteriorated rapidly on account of not being painted because the plant could not shut down to allow the time for this work to be done. In such cases the water will become badly tainted from the corrosion, will not be fit to drink, and may be harmful to the product of the plant if the water is used for industrial purposes. Water stored in a wood tank is always sweet and clean. The three-inch wall of wood in the wood tank will keep the water cool in the hot months and will also protect it from the frost in the cold months.

SHIPMENTS

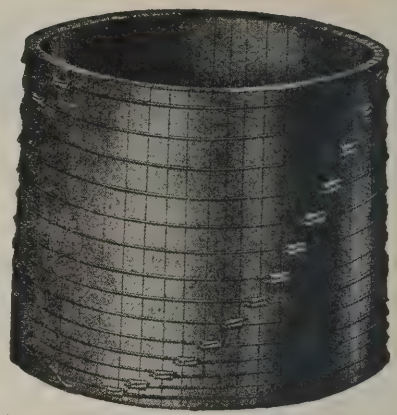
Shipments can be made to any part of the country from our New York, California or Illinois factories.

GENERAL

Wood tanks are usually built of 2″, 2½″ or 3″ material, according to the size of tank and proposed use. For special purposes they are sometimes built of 4″, 6″ or heavier material. We carry all of these thicknesses in stock. 2″ material can ordinarily be used for capacities to 10,000 gallons.

WOODEN TANKS

Guaranteed to Satisfy



All Hauser-Stander tanks are scientifically made by experts, who are thoroughly experienced in building tanks of quality. Our specialty: tanks to order, for every purpose; inks, Chemicals, Water, Rubber Lined, Acid Pickling, etc.

CO-OPERATIVE SERVICE

A report of the study of action of various acid and chemical solutions on different tank woods resulting from tests made by our chemical engineers, contains much valuable information and will be furnished on request.

American Steel & Wire Company's

AERIAL TRAMWAYS

NO matter what the contour of the ground, we will construct a tramway that will transfer material at minimum expense; and no grades are too steep to surmount; no rivers or valleys too wide to cross; and no grading, bridges or viaducts of any kind are required. There is practically no limit to the length of these tramways.

Unlike All Others!

FOOT SET RAT AND MOUSE TRAPS

Sanitary, Safe, Sure

Made From the Finest Grade Galvanized Steel and Oil Tempered Wire

5 Reasons Why Snappy Traps Are Better Traps:

Easily Set—A mere pressure of the foot sets it ready for action.

Safe—Catch rats and mice and not fingers.

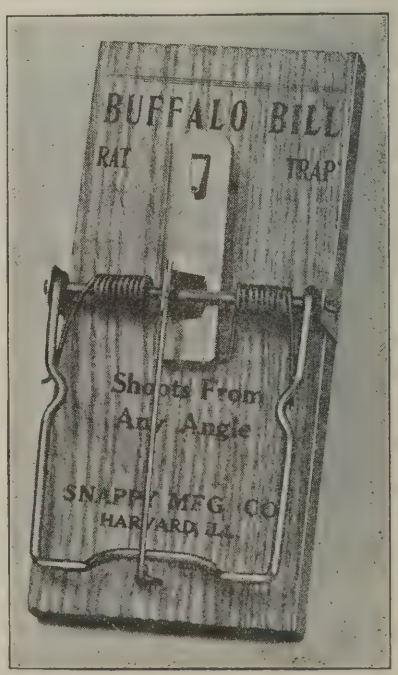
Sensitive—A card dropped on the trigger will cause it to react instantaneously.

Sanitary—Easily sterilized by dipping in hot water, thereby doing away with the scent of the rodent. Another very important sanitary feature is that it is unnecessary to touch the animal after it has been caught, as a slight pressure on the foot plate will release it.

Sure—Made in such a way they have the same point of contact on every side of the jaw. A small ridge at the front of the trap also obviates any chance of the rodent working its way out.

SNAPPY TRAPS CATCH RATS AND MICE, NOT FINGERS

BUFFALO BILL RAT and MOUSE TRAPS



Shoot from any angle. No matter whether animal presses down on trigger, pulls up or to either side, the fast working oil tempered spring and jaw gets him.

As one leading hardware jobber says: **"The only improvement made in Wood Base Rat and Mouse Traps in a century."**

Easier to set and surer to catch than any of the old style wood base traps.

If you select your Steam Trap as it should be selected—by the size of its discharge orifice, its discharge capacity in gallons per hour—you will select the American Ideal.

American Ideal Steam Trap

The American Ideal Steam Trap is a skillfully designed trap which has thoroughly proven its superiority in many representative plants under varied and severe conditions.

It is simple in design, rugged in construction and is particularly noted for its extraordinary capacity.

A steam trap that's different and better

ONE of the most widely used traps in the world. Water or steam entering patented inverted submerged bucket from below causes bucket to rise or fall, opening and closing valve through powerful leverage system. For pressures from 0 to 300 lb., for vacuum, and for oil. Heavy duty trap for high pressure and superheat. Special trap for pulsating pressure. Valve replacements seldom necessary.

KENNEDY

Valves, Hydrants, Fittings

Fig. 27

Because of the wide range in which they are made—for steam, oil, gas, water, etc., and in sizes up to 60-inch diameter—there is no valve requirement that Kennedy valves will not fill.

Forty-six years' experience and progressive designing are behind the Kennedy product.

600 types and sizes in which Kennedy products are supplied include fire hydrants, cast iron flanged and malleable iron and brass screwed pipe fittings. They are fully listed in the new Kennedy catalog. Their construction, points of special goodness, and detailed information regarding their application are listed in this book, which should be on the desk of every valve, hydrant and pipe fitting user.

LUNKENHEIMER
VALVES AND ENGINEERING APPLIANCES

The name "LUNKENHEIMER" on Valves and Engineering Appliances is a definite assurance of "SATISFACTION"—not the ordinary "good-enough" kind, but that positive, perfect, lasting satisfaction which comes with the knowledge of having installed the best, after long and severe service has proved them the most efficient, durable and economical.

The extensive line of LUNKENHEIMER PRODUCTS is fully illustrated and described in Catalog 58 BB, a copy of which will be sent upon request.

VALVES of Bronze, Iron and Steel of all types and sizes, and for pressures and temperatures to meet all prevailing operating conditions.

BOILER MOUNTINGS consisting of Non-Return, Pop Safety and Blow-off Valves, Water Columns and Gauges, Gauge Cocks, Low Water Alarms, Fusible Plugs, etc.

LUBRICATORS for Steam, Gas, Gasoline, Oil, Compressor and Pump Cylinders.

OIL AND GREASE CUPS in great variety for every conceivable purpose.

ALSO Whistles, Cocks, Pipe Fittings, Unions, Air Nozzles and numerous other appliances.

Our New Model "J" Pop Valve is a Universal Valve with exceptional capacity.

American Pop-Safety and Relief Valves

Simplicity of design, minimum of working parts and perfection of material and workmanship are the keynotes of American Valve construction. American Valves have proven their superiority by many years of extensive service under widely diversified conditions and are particularly noted for their exceptional relieving capacity.

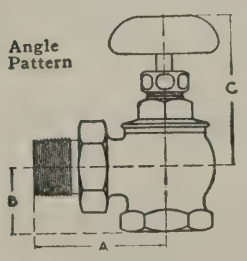
Prier Radiator Valves

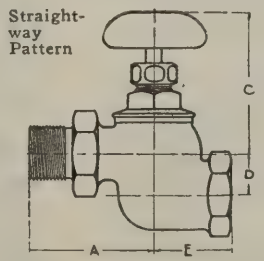
Non-rising stem
HIGH LIFT

ATTRACTIVE in design, manufactured by high grade craftsmen from uniformly high quality material, this valve, while adapted to heating systems generally, is particularly approved for forced systems of hot water heating and one-pipe steam systems because of the exceptional free drainage of water which it affords.

A Quality Valve at a Reasonable Price



Two outstanding values of the Prier design are the Non-rising stem and the High Lift



Material

The body and all parts are made of high grade brass. GENUINE JENKINS DISCS ARE USED, the disc being securely held in place in its holder. The handle is non-breakable and is molded of a special heat-resisting composition with hard rubber finish. A valuable feature of this handle is that because of the metal plate molded into the composition, the rubber handle cannot turn on the stem. Another strong feature of the valve is the easy opening and closing of the handle without binding. A strongly made packing nut and gland holds the molded packing in place.

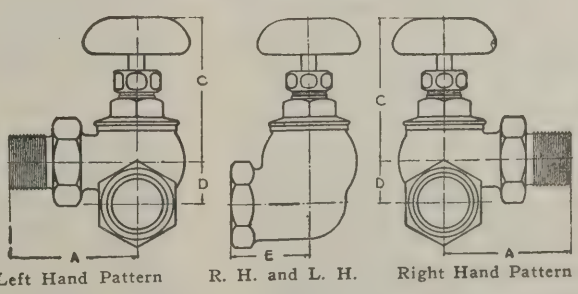
Workmanship

Close grained smooth castings molded, finished and nickel plated in our own foundries and shops produce a valve of unusual beauty and service.

Those parts of the valves—hexes, nuts and union nipple—on which the steamfitters' tools are used are made especially heavy and have a milled finish.



Prier valves are individually tested and inspected before shipment.

All parts of Prier valves are easily accessible and are interchangeable.

Dependable Upson Board is made in four thicknesses, several widths, and many lengths.

A Size and Thickness for Every Purpose

To make Upson Board the board of a hundred uses for use in a thousand different ways, there's a size and thickness for every conceivable purpose. The most complete line of wall board made!

Not only is it the most dependable board for lining the walls and ceilings in every class of building—new or old—but it has hundreds of uses in manufacturing in place of thin lumber and veneer.

It is the hardest, *strongest*, and stiffest board made. Saws, cuts and handles just like high grade lumber. Its superior painting surface saves $5 to $15 per thousand feet in cost of decoration.

UPSON PROCESSED BOARD

UPSON-BOARD (PROCESSED)

THE MOST DEPENDABLE BOARD MADE IN AMERICA

UPSON PROCESSED BOARD

Thus the *little* difference in price does not measure the *big* difference in quality.

We will be glad to send you samples and literature.

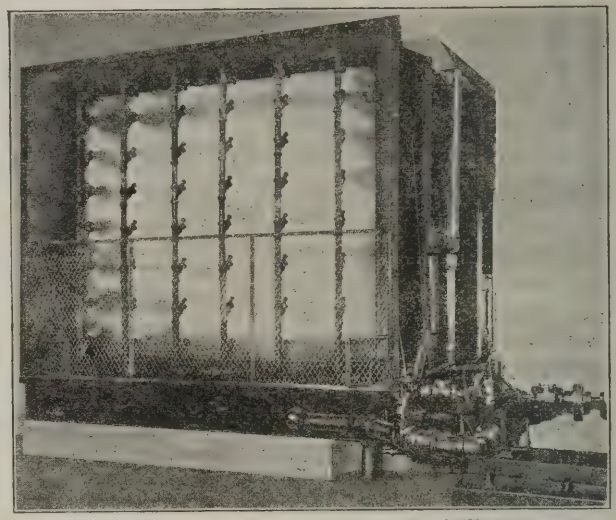
AIR WASHERS and COOLERS

Open or Closed System of Air for Generator Service



Complete Apparatus for Air Purification in Public Buildings

Standard Washers for Electric Generator duty are designed for a continuous and exacting service.

A special type of non-clog **impact** nozzle is used, these nozzles being mounted in pairs on vertical headers. The flat spray from each nozzle meeting that from the nozzle just above or below is broken up into an extremely dense and uniform cloud which fills the spray chamber. A copper scale arrester is located back of each pair of nozzles, its large area affording long operation without cleaning.

To insure long life, nozzles are made of Monel Metal, the washer casing and water box of American Ingot Iron and the eliminator plates of lead-antimony.

The devices provided for automatic cleaning of the water box without shutting off any of the nozzles insure a continuous supply of washed air.

DO YOU KNOW

that we are consulted by thousands of Buyers annually, who request to be "put in touch" with the manufacturers of the best products in particular lines of trade and that we are frequently asked to recommend the *one* which we consider to be *the* best?

If you are an advertiser we file your Catalog in our library and our Information Bureau uses it in connection with making such recommendations.
